

NOS VALEURS

Scientific Excellence

Implementation of a scientific excellence regarding research and expertise notably through the publication of the results and the evaluation of the work programme by a Scientific Council.

Precaution

A precautionary approach for risks associated with low doses of ionising radiation.

Transparency

Transparency on the work programme through the publication of the main achievements.

Autonomy

Autonomy in carrying out its missions.

Openness to Society

Development of the work programme in interaction with stakeholders and dissemination of radiological protection culture.

SCIENTIFIC EXCELLENCE

- Design, analyze, document study and research activities in a thoughtful and meticulous manner.
- Ensure rigor in the collection, acquisition, analysis, archiving of data, as well as in the communication and publication of results.
- Ensure fair, honest and confidential use of data:
 - Do not commit acts of falsification, fabrication, or scientific plagiarism.
 - Comply with intellectual property rules.
 - Comply with the rules of confidentiality of information, data or new concepts obtained during studies and research work.
- Ensure periodic consultation of the CEPN Scientific Council on study and research work.
- Ensure the maintenance of the team's skills and know-how.
- Provide its employees with access to knowledge and ensure scientific monitoring of the group's studies and research themes.
- Take appropriate measures to preserve sources and results of work.

PRECAUTION

- Follow and take into account international developments in knowledge of radiological risk assessment and management.
- Promote a precautionary approach and the application of the ALARA principle (as low as reasonably achievable taking into account economic and societal factors) in the assessment and management of radiological risk.

AUTONOMY

- Guide the study and research program in accordance with the objectives of the strategic plan and taking into account the recommendations of the Scientific Council.
- Make timely and conscientious use of allocated funds.
- Ensure that contracts or agreements relating to the results of studies and research include provisions guaranteeing the autonomy of the team to carry out its missions.

TRANSPARENCY

- Promote provisions allowing the publication of the group's main study and research results while respecting contractual commitments.
- Respect the rights and rules concerning access to and processing of personal information.

OPENNESS TO SOCIETY

- Contribute to the training, sharing and transmission of knowledge, skills and best practices in the field of radiological risk assessment and management among stakeholders in radiation protection.
- Support stakeholders in acquiring the skills necessary for their involvement in the processes of assessment and management of risks related to exposure to ionising radiation.
- Respect the autonomy of judgment and decision of stakeholders in the processes implemented.
